# READ AND SAVE THESE INSTRUCTIONS

## Important Safety Information

To avoid damage to this scale, please read and follow all instructions and safety guidelines in this manual.

### SCALE

- **Do not** exceed the 22 lb / 10 kg weight capacity, as it will damage the scale. An error indicator will appear on the LED display if the limit is exceeded.
- The scale is IPX6 water resistant, which means it can withstand most liquid spills without permanent damage. However, we still recommend wiping the scale dry with a soft cloth after any spills to keep it in optimal condition.
- Handle with care. This scale is not intended for commercial or heavy-duty use.
- Keep the scale in a cool, dry place. Avoid exposure to damp environments or extreme temperatures.
- Household use **only**.

### BATTERY

When the scale is in use,  will flash if the scale is running low on battery. The scale's display will show "Lo" when the battery needs to be charged immediately. Follow the steps to recharge the battery.

1. Insert the USB charging cable into the USB charging socket.
2. Plug the USB charging cable into a DC 5V adapter and plug into an outlet. You can also plug the cable into a powered USB outlet.
3. When charging,  will flash. Once the battery is fully charged,  will stop flashing.

***Note:** The scale can't be used while charging, so it is recommended to charge the battery when  flashes, indicating low battery.*

# Using Your Scale

## Note:

- For accurate results, **always** place the scale on a hard, flat surface, and keep the scale away from dirt, dust, vibrations, wind, air currents, and electromagnetic interference.
- When you turn on the scale, choose units, or use the tare function, wait for the display to read "**0.00**" before measuring.

## GENERAL OPERATION

1. Place the scale on a hard, flat surface.
2. Tap  to turn on the scale. Make sure the display reads "**0.00**". If the screen does not display "**0.00**" automatically, tap  to adjust to zero.
3. Tap **UNIT** to select your desired measuring unit, which will show on the bottom of the display.
4. Place your item on the scale.
5. Wait for the reading on the display to stabilize.
6. When you're done, reset the scale by removing all items from the scale. If the display doesn't read "**0.00**", press  to reset the weight to zero.

## ZERO / TARE FUNCTION

Whenever you measure items inside a container, you can use the tare function to remove the container's weight from the final measurement.

1. Tap  to turn on the scale. Make sure the display reads "**0.00**". If the screen does not display "**0.00**" automatically, tap  to adjust to zero.
2. Place the container on the center of the scale.

3. Wait for the reading on the display to stabilize. The display will show the container's weight.
4. Tap  to tare the weight of the container. The screen will now display "**0.00**".
5. Place the liquid or items into the container. The scale will measure the contents without including the weight of the container.
6. When you're done, reset the scale by removing all weight and tapping  again.

## UNIT CONVERSION

To change the unit of measurement, tap **UNIT** until the display shows your desired unit of measurement.

## HOLD FUNCTION

There are two ways to use the hold function:

- A. Place your item on the scale. Tap **HOLD** to lock the measurement reading. Tap **HOLD** again to unlock the display.
- B. Tap **HOLD** and place your item on the scale. Wait 3 seconds for the reading to stabilize. The scale will automatically lock the measurement reading. Tap **HOLD** again to unlock the display.

**Note:** In hold mode,  will not work. You can still use **UNIT** to switch between units.
